PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years shipping production applications end-to-end using React, Next.js, Node.js, and Express, plus enterprise jQuery-based systems at scale. Comfortable working async and collaborating with distributed, cross-functional teams. Experienced designing RESTful APIs, integrating third-party and payment gateway services (Paystack, Flutterwave), and implementing JWT-based authentication and authorization. Currently a Software Engineer II contributing to architecture decisions, backend/API work, and code review. Track record of measurable impact — 30% lift in user engagement, 100% on-time freelance delivery — and experience mentoring 20+ junior developers.

KEY SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, jQuery, HTML5, CSS3, Bootstrap 4, Tailwind CSS

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication & Authorization, MongoDB, SQL, Database Schema Design

Integrations & Practice: Payment Gateways (Paystack, Flutterwave), Technical Decision-Making, Code Review, Agile, Git/GitHub, CI/CD, Docker

Other: SEO Optimization, Responsive & Accessible Design, WordPress, Cross-Browser Debugging

Remote Collaboration: Async communication, distributed team workflows, self-directed delivery across time zones

PROFESSIONAL EXPERIENCE

Software Engineer II — BigStack Technologies 2025 – Present

- Contributes to architecture and technical decisions for full-stack web applications (React/Next.js, Node/Express, TypeScript), designing RESTful APIs for fintech and e-commerce platforms.
- Integrates payment gateways (Paystack, Flutterwave) with transaction verification and secure workflows; implements JWT-based authentication and authorization.
- Designs database schemas and CRUD for users, orders, and transactions — error handling, validation, performance optimization.
- Develops responsive, high-performance interfaces and translates UI/UX designs into clean, reusable, scalable components.
- Leads code reviews across the team and delivers hands-on training and mentorship.
- Collaborates with designers, backend developers, and stakeholders in an agile environment.

Frontend Developer — CarrotSuite 2025 – Present

- Builds and debugs frontend features across a multi-module CRM/healthcare platform — quotations, approvals, tariff management, and remittance reconciliation — using jQuery, Bootstrap 4, and Select2.
- Diagnosed and fixed a DOMContentLoaded initialization bug in a tariff matrix page caused by AJAX-injected content.
- Integrated Paystack into a subscription and payment management flow via the platform's analytical API.
- Resolved layered UI bugs (Select2 z-index conflicts, nested API response paths, incorrect endpoints) using an appendTo(document.body) portal pattern across modules.

Full-Stack Developer — Independent Projects 2023 – Present

- Designs and builds full-stack applications end-to-end — React/Next.js frontends, Node.js/Express backends.
- Designs MongoDB and SQL data models and builds REST APIs, handling API design and third-party API integration.
- Delivered 8+ freelance projects for global clients (business websites, portfolios, e-commerce) including payment gateway integrations, with 100% on-time delivery.
- Optimizes sites for SEO, boosting client rankings and organic traffic.

Web Developer & Technical Education Instructor — Omnific Works 2024

- Developed responsive NGO and business websites, increasing user satisfaction by 25%.
- Led an e-commerce redesign that produced a 30% rise in donations.
- Built and maintained WordPress and custom-coded sites — contact forms, donation flows, analytics tracking.
- Trained 20+ junior developers, improving their technical skills and delivery speed.

Frontend Developer — Avitech International 2025

- Built a responsive legal document platform from Figma designs (HTML, Bootstrap), fully remote with a distributed team.
- Translated Figma prototypes into pixel-accurate, cross-browser-compatible pages.
- Debugged and resolved layout and responsiveness issues across devices.
- Ensured accessibility compliance, improving usability for all users.

PROJECTS

IBM Capstone (Cloud-native React + Node.js app with MongoDB, auth and REST APIs; Docker/CI/CD) · Cardily (NFC-enabled smart business card platform with analytics dashboard) · ExceFort Environmental (responsive geotechnical services website, +20% inquiries).

EDUCATION

B.Sc. Biology — University of Nigeria, Nsukka (2019 – 2023). Applied research and analytical rigor to logical problem-solving in software development.

CERTIFICATIONS

IBM Full-Stack JavaScript Developer (Coursera/IBM, 2025) · CS50's Understanding Technology (Harvard, 2024) · Kaggle Python (2024) · Frontend Development & Web Technologies (Incubator and Utiva) · Frontend Fundamentals (Pirple).

ACHIEVEMENTS

Increased website engagement by 30% via responsive design and SEO · Delivered 6+ live websites for NGOs, businesses, and advocacy groups · Improved junior developer productivity by 40% through structured training.
